CUSTOMER JOURNEY PLAYBOOK · NATURAL PERSONS

Individual Onboarding Document Playbook

Clear asks. Risk-based. Fast green lane when the pack is complete.

BEFORE

Confused by RFIs, nationality treated as High, abandoned mid-upload.

AFTER

Knows exactly what to upload; account activated under fair monitoring.

Document ID	MAL-GA-ONB-IND-PLAYBOOK-v1.0
Perimeter	Global Account (US / Zenus)
Basis	Mal-CRAM-US-01 FREEZE-03 · EDD Individual Matrix · Five-gate spine · GA Self/C2C Scenario Pack
Audience	Onboarding ops · Compliance · Customer success
Generated	7/17/2026, 6:56:04 AM

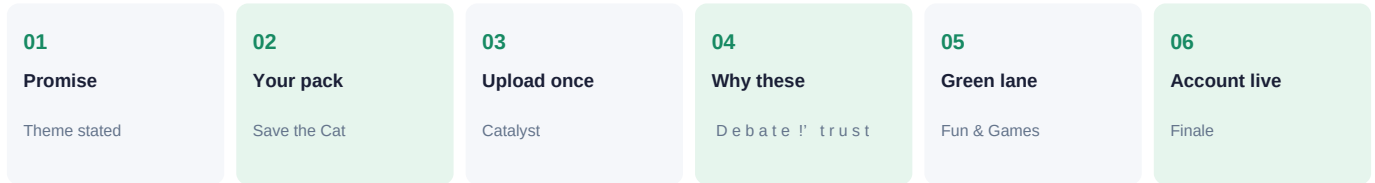

THEME · THE PROMISE

Transformation: from “I don’t know what you want from me” to “I’m banking globally with dignity.” Archetype: Golden Fleece — a staged road to the prize (activated account). Core loop: show the personal checklist! upload once! see never sets the pack; residence + income + triggers do.

1. The journey — six beats to activation

Hide the compliance lecture inside a clear path (Pope in the Pool). Seed the six things we need early so each upload feels like a win (Six Things That Need Fixing).

STASIS = DEATH (HONEST)

Without a clear pack, High-corridor customers stall on endless RFIs and leave for lighter competitors. Clarity is the competitive control — not weaker AML.

Engine decision spine (automatic)

- G0 — Residence permitted vs Zenus restricted/prohibited list
- G1 — Screening fail-closed (sanctions / PEP / adverse)
- G2 — Prohibited use of personal account
- G3 — CRAM score + corridor floors
- G4 — Targeted EDD pull: only incremental docs for surviving triggers

2. Universal baseline — every permitted individual

Customer-facing language. Ask for these every time before any nationality overlay.

#	Document	Customer wording
1	Passport or national ID	Clear photo of a valid government ID — all corners visible, not expired.
2	Proof of address	One document in YOUR name, issued in the last 3 months, showing your current home address.
3	Tax self-cert	Where you are tax resident + TIN if you have one (CRS / FATCA).
4	Contact	Phone and email you control.
5	Purpose & volume	Why you need the account and expected monthly activity.

PROOF OF ADDRESS — PASTEABLE

Please upload one document that shows your full name and current home address, issued in the last 3 months. Best options: utility bill (electricity, water, gas) or bank statement. App screenshots are OK only if issuer, name, address and date are clear. Edited files are rejected.

3. Proof of address by residence country

Residence drives the corridor and which local documents we accept. Nationality does not change the PoA list.

Residence	Corridor	Accept one (name-matched, "d90 days)	Local ID notes
Egypt	High · EDD	Electricity / water / gas; bank statement; mobile postpaid; rental + bill	National ID or passport
Pakistan	High · EDD	Electricity / gas; bank statement; mobile postpaid; rental + bill	CNIC / NICOP or passport
Turkey	Med · EDD	Elektrik / do algaz / su; bank statement; rental + TC Kimlik or passport	
Bangladesh	Med · Std+	Electricity / gas; bank statement; mobile postpaid	NID or passport
Indonesia	Med · Std+	PLN / PDAM; bank statement	KTP or passport

Residence	Corridor	Accept one (name-matched, "d 90 days)	Local ID notes
Philippines	Med · Std+	Meralco / water; bank statement	PhilID or passport
Saudi Arabia	Med · Std+	Utility; bank statement; Iqama address + bill	National ID / Iqama + passport
Jordan	Med—High	Electricity / water; bank statement; rental + bill	National ID or passport
UAE	Hub · EDD	Ejari + DEWA/SEWA/etc. or bank statement; tenure history if asked	Emirates ID + passport + visa

4. Proof of income — by how they earn

Majority of GA corridors are EDD or Standard+. Pre-request income docs with ID + PoA to cut RFI waits (Promise of the Premise = one complete upload).

Segment	Ask for (all that apply)	Customer wording
Salaried	Employer letter or contract + last 3 payslips + 3 months bank statements showing salary	Show us your job and the salary landing in your account.
Freelancer	Platform statements / invoices (3–6 months) + payout / bank statements + key contracts	Show platform earnings and where payouts arrive.
Self-employed	Trade licence + 3–6 months business bank statements + tax return if available	Show the business is real and the money matches.
Student / sponsored	Enrolment + sponsor letter/ID + sponsor support evidence + own statements	Who supports you, and how?
Investments / inheritance	Brokerage / sale contract / estate letter + proceeds into their account	Only when this is how wealth was built.

SOF VS SOW — SIMPLE

Source of funds = where the next money into this account comes from. Source of wealth = how overall wealth was built. For a normal salaried customer, employer letter + 3 payslips + 3-month statements usually covers both.

5. Nationality overlays — only when triggered

Situation	Extra documents	Outcome posture
Clean third-country national on permitted High/Med corridor (e.g. Hungarian in Egypt)	Passport + residence/work visa + local PoA + income pack — no "nationality pack"	Corridor drives EDD; passport does not lower the floor
Restricted nationality, no money nexus to that country	Visa + tenure + strong local SoF + confirm no corridor to restricted country	High / enhanced screening; onboardable if clean
Restricted-country SoW (Rule 1)	Documentary SoW + remittance trail out of that country + senior approval	High floor; hold/decline if unevidenced
Prohibited nexus (e.g. Iran funds/corridor)	None curative	Block / decline — documents do not cure
Foreign PEP / RCA / adverse media	PEP declaration + corroborated SoW + senior/MLRO approval	High; PEP-neutral wording to customer

6. Worked example — Hungarian living in Egypt (salaried)

COPY TO CUSTOMER

To open your Global Account please upload clear photos/PDFs (not edited):

- 1) Hungarian passport (photo page).
 - 2) Egyptian residence/work visa AND one Egyptian proof of address in your name from the last 3 months (utility bill or bank statement).
 - 3) Employer letter or contract, last 3 payslips, and last 3 months bank statements showing salary credits.
 - 4) Tax residency/TIN form and a short note on expected monthly use.
- Once complete and screening clears, we aim to activate quickly under enhanced monitoring for the Egypt corridor. We only ask for more if something is missing or unclear.

Engine path: Residence EG ! High corridor ! EDD mandatory · Nationality HU ! no High floor alone · Onboardable, monitored — not blocked.

7. Whitelisted / fast cycles — complete pack, not nationality

There is no nationality whitelist. Fast track = document-complete + clean gates. Soft product limits after activation protect the programme without humiliating the customer.

Lane	Entry conditions	Target	Feeling to engineer
Green	Permitted residence · screening clear · no PEP/adverse · SoF = residence · full pack day 0	< 24–48h	Momentum — “I’m almost there”
Amber EDD	High corridor (EG/PK/AE hub) · same pack · analyst SoF coherence check	“d 7 2 h i f c o m p l e	Fair review — not a black hole
Red	Foreign PEP · Rule-1 SoW · adverse · incomplete/incoherent income · prohibited nexus	Senior path	Honest stakes — no false speed promise

Soft controls after activation (not nationality bans)

- Lower monthly velocity on High corridors until behaviour proves clean
- Block restricted/prohibited corridors at product level
- Licensed VASP / charity whitelist for relevant payments
- Same-name Confirmation of Payee on self-transfers

8. Operator cheat sheet — residence × pack

Lives in	Default posture	Always ask	Usually ask	Nationality only adds
Egypt	High / EDD	Passport or EG ID; EG PoA <90d	Employer + 3 payslips + 3m statements	Visa if foreign; SY/IR nexus check
Pakistan	High / EDD	Passport or CNIC; PK PoA <90d	Employer + 3 payslips + salary statements	Visa if foreign; AF/IR overlays
Turkey	Med / EDD	Passport or TC ID; TR PoA <90d	Employer letter/payslips + salary statement	Visa if foreign
Bangladesh	Med / Std+	NID/passport; BD PoA <90d	Employer + payslips + statements	—
UAE	Hub / EDD	Passport + Emirates ID + Ejari/utility	Employer payslip; stronger if LB SoW / PK onward	Visa + tenure
Saudi	Med / Std+	Passport/Iqama; SA PoA	SoW if large; PEP screen mandatory	YE etc. if SoW nexus
Jordan	Med–High	Passport/JO ID; JO PoA	Stronger SoW; charity controls	PEP package if hit

9. What not to do

- Do not invent a different 15-document list per nationality
- Do not skip SoF on EG/PK to win speed — pre-ask it up front instead
- Do not treat EU/US passports as a Low shortcut on a High residence corridor
- Do not promise Green-lane speed on Red-lane triggers
- Do not tip off customers with the word “PEP” — frame as routine verification

10. Sign-off

I confirm this Individual Onboarding Document Playbook aligns with Mal-CRAM-US-01 and is fit for operator use and customer-facing checklists.
