Executive Summary

i2c is excited about the opportunity to provide solutions to Mal.ai. Thank you for considering us as your business partner for your processing needs. We provide cost-effective and efficient processing solutions customized to fit our partners' individual needs. i2c is enthusiastic about the opportunity to initiate our partnership by providing this proposal for services.

i2c a global provider of highly configurable cloud-based digital banking and payments solutions. Using i2c's advanced global processing "building block" technology, clients can dynamically configure a comprehensive set of credit, debit and prepaid solutions. i2c delivers unparalleled flexibility, agility, performance without sacrifice on providing secure and reliable payments—all from a single global SaaS platform. Founded in 2001, and headquartered in Silicon Valley, i2c's next-generation technology helps organizations drive revenue growth, scale and adapt to change while supporting millions of users in more than 200 countries and territories and all time zones.

Setup Fees

Setup Fees			
Service	Unit	Price	Description
Instance Setup			
Instance Provisioning Bundle			
MDOBD06000 Instance Provisioning Bundle Data Base, and Transaction Processing (OLTP) infrastructure	One-time/ Instance	\$106,000	i2c provisions a customer-specific virtual instance of its processing platform, providing a dedicated and independent database with real-time replication for high performance and high availability. Each instance is recommended for the exclusive use of a single financial institution and/or issuing country. If the customer desires additional instance(s), they are available upon request and subject to a quote. i2c offers many Applications and Services, Customer may select to support various value propositions and use case(s) needs. Includes the setup of additional Applications and Services: - Administrative Portal (C-Admin) - Customer Service Agent Portal (C-Agent) - i2c API Setup and Certifications (Pull and Push) - Contactless Payment - Digital Wallet (Apple Pay, Google Pay and Samsung Pay) - Debit/ Cooperative Authorization - Fraud Risk Management Services – Managed Fraud - Network-based Authentication (3-D Secure) - OTP (One Time Password) – Yellow Path - Dispute Operations Services

Each User > 50		\$25	

API Services

API Services			
Service Description			i2c has extensive Application Programming Interface (API) options to access and share information in and out of the i2c platform.
Pull APIs (Customer-initiated)			
Service Description			i2c offers customer to code to the i2c's PULL API specifications, a customer-initiated transaction. i2c server responds to requests originated by Customer's system, 2-way communication. Access to select API services may require Customer to be PCI compliant and/or setup encryption protocol recommended by i2c.
MDOEE06009 Setup Fee	One-time	Included	If customer desires to use i2c WebServices API(s), a 'Pull' of data from i2c server, includes i2c specification and ten (10) hours of testing and certification of customer's application(s). Additional Professional Services available, if needed.
MDREE07009 Subscription Fee	Per Month	\$2,000	Fee applies for monitoring and maintaining API connectivity.
MDREE00009 Usage Fee	Per Month		API calls that result in a billable transaction event do not count toward allocation, are free of charge (i.e., debit/credit, status update). Excessive use of APIs (over 20 APIs per account) will incur Additional Usage Charges of \$0.010 per API (MDREE00009A).
	Account on File		
	1 to 50,000	Included	
	50,001 to 100,000	\$1,000	
	Each additional 100,000 accounts	\$1,000	
Push APIs (i2c-initiated)			
Service Description			i2c offers customer to code to the i2c's Push API specifications, an i2c-initiated transaction. Based upon predefined rules/ triggers against transaction activity, i2c server pushes select notification of activity to Customer's system, 1-way communication. Access to select API services may require Customer to be PCI compliant and/or setup encryption protocol recommended by i2c.
MDOEE06010 Setup Fee	One-time	Included	If customer desires to use i2c WebServices API(s), an i2c-initiated 'Push' of a notification of activity, based upon defined rules and triggers against transaction activity, sent to Customer in a one-way communication, includes i2c specification and ten (10) hours of testing and certification of customer's application(s). Additional Professional Services available, if needed.
MDREE07010 Subscription Fee	Per Month	\$3,000	Fee applies for monitoring and maintaining API connectivity.
MDREE00010 Usage Fee	Per Month		Excessive use of APIs (over 20 APIs per account) will incur Additional Usage Charges of \$0.010 per API (MDREE00010A).
	Account on File		
	1 to 50,000	Included	
	50,001 to 100,000	\$1,500	
	Each additional 100,000 accounts	\$1,500	

Contactless Payment

Contactless Payment			
MAOEE06272 Setup Fee (Visa payWave/ Mastercard PayPass / Discover D-PAS)	One-time	Included	If customer desires i2c to implement Card Association's contactless payment method. Customer is responsible for all third-party charges, as necessary, as pass-through expenses.

Digital Wallet

Digital Wallet			
MAOEE06271 Setup Fee	One-Time/ Digital Wallet/ Network Project	3 Included	Setup cost per mobile wallet enabled for Token Services. (Apple Pay, Google Pay and Samsung Pay) Optional: In-App Provisioning Service (MAOEE06271A) is included in setup, if implemented as a part of project. Note: Multiple BINs with the same network can be enabled at the same time with no additional cost. If after the initial digital wallet setup is completed, additional BINs need to be enabled, standard BIN setup project cost will apply.
MAOEE06271A In-App Provisioning Setup	Per Wallet Project	\$3,000	Fee applies to enable In-App Provisioning support for a BIN or BIN range already enabled for Digital Wallet services. The scope of work includes network paperwork submission, project management, testing, and support.
MAOEE06271B Subsequent (Additional) In-App provisioning	Per Wallet Project	\$3,000	Fee applies to enable tokenization services on new BIN(s) of an existing card network. Optional, In-App provisioning service included in setup, if implemented as part of the project. Note: Up to five (5) BINs with same network can be enabled at same time with no additional cost.
MAREE07271 SDK Subscription Fee	Per Month/ Additional Branding or Language	\$500	Ongoing support and maintenance for each additional branding or language, beyond the default, for i2c's mobile SDK, as well as platform-level updates or changes required by networks or mobile wallet providers. Note: This includes English and/or Spanish language (both can be covered under one subscription fee at client's choice).
MAREE04271A Card Provisioning Fee	Per PAN Enrollment	\$0.10	Fees are assessed regardless of provisioning method utilized (In-app, Manual or Web) and provides token account management capabilities including provisioning, deletion and token lifecycle management.

Debit/ Cooperative Authorization

Debit/ Cooperative Authorization			
Service Description			Fee applies if Customer desires i2c Platform to integrate with a host system to participate in the authorization request/response message (i.e., Cooperative Authorization).
MAOEE06277 Setup Fee	One-time	Included	If customer desires i2c Platform to integrate with a host system to participate in the authorization request/response message, an auth decision dependent on both parties (i.e., Cooperative Authorization) via ISO 8583 format.
			Customer will be required to specify specific use case(s) and prerequisite infrastructure to respond within specific timeframes.
MAREE07277 Subscription Fee	Per Month	\$5,000	Fee applies to monitor and maintain connectivity.
MAREE04277 Usage Fee	Per Month		Excessive use (over 30 transactions per account) will incur Additional Usage Charges of \$0.025 per transaction (MAREE04277A). All third-party charges will be an additional pass-through expense.
<u>Account on File</u>			
1 to 50,000		Included	
50,001 to 250,000		\$2,500	
Each additional 100,000 accounts		\$1,500	

Miscellaneous

Miscellaneous			
MAREE04278 File Processing Fee	Per File	\$20	Fee applies for each file; to prepare, process and deliver or received from an external party. Available on-demand, daily or weekly basis.
MAOEE04284 Professional Services	Per Hour	\$200	Fee applies to use i2c staff for requested services and requirements of an engagement. Minimum billing will be \$3,000, irrespective of the number of hours. However, the cost per actual will be charged if it exceeds more than 15 hours of Professional services.

Fraud Risk Management Services

Managed Fraud Service				
Service Description				i2c will provide a comprehensive suite of fraud services that includes active monitoring, detection, automated and manual actions, reporting, and case management. i2c's Managed Fraud Service starts with developing transaction fraud strategies based upon CLIENT's use case(s), rules configuration and testing oversight. The i2c Fraud Response Team will perform enhanced human monitoring of authorization rates, rule performance and alerts. For Cards identified by Card Network brands and i2c universal scans, the Fraud Response Team will take action, such as applying card fraud blocks. The Fraud Response Team will also conduct configuration optimization and performance reviews. Unlimited automated 2-way verification alerts via SMS, email or IVR are included (delivery charges are passed through).
MAOXX02402 Setup Fee	One-time	Included		Fee applies for initial use case discussions, strategy development, configuration, and support for CLIENT testing. Includes up to 3 programs. Each additional program is \$1,000.
MARBD07402 Subscription Fee	Per Month	\$5,500		Ongoing risk management support.
MARBD04402 Usage Fee	Per Month			Card account defined as all cards with a status other than "Closed".
	<u>Monthly Volume Tiers</u>			
	Account On File			
	1 to 100,000	Included		
	For each additional 100,000 accounts	\$2,000		
Customer Fraud Notification Services				
MAREE02252B SMS Notification (one-way)	Per Alert	Included		Fee applies to send real time alerts to an accountholder. Delivery fees incurred by i2c will be a pass-through expense charged to CLIENT.
MAREE02252C SMS Verification (two-way)	Per Alert Pair	Included		Fee applies to send real time alerts to an accountholder and receive their response. If positive confirmation, the next transaction is authorized for a set period of time. Delivery fees incurred by i2c will be a pass-through expense charged to CLIENT.
MAREE02252A Email Notification (one-way)	Per Alert	Included		Fee applies to send real time alerts to an accountholder. Delivery fees incurred by i2c will be a pass-through expense charged to CLIENT.
MAREE02252J Email Verification (two-way)	Per Alert Pair	Included		Fee applies to send real time alerts to an accountholder and receive their response. If positive confirmation, the next transaction is authorized for a set period of time. Delivery fees incurred by i2c will be a pass-through expense charged to CLIENT.
MAREE02151D IVR Notification (one-way)	Per Alert	Included		Fee applies to send real time alerts to an accountholder, a text-to-speech message. Requires use of i2c IVR Service.
MAREE02151E IVR Verification (two-way)	Per Alert Pair	Included		Fee applies to send real time alerts to an accountholder and receive their response. If positive confirmation, the next transaction is authorized for a set period of time. Requires use of i2c IVR Service.

Managed Fraud Service - Optional Services				
Fraud Professional Services				
MAREE02284B Professional Services	Per Hour	\$300	Fee applies to use i2c staff for requested services for an engagement, requires a Statement of Work (SOW) and quotes are provided by Work Order (WO) on time and materials basis. Minimum billing of \$3,000.	
• Data Preparation/ Requests				
• Third Party Audit Support				
• Law Enforcement/ Civil Subpoena Support				

Other Fraud Related Services

Network-based Authentication (3-D Secure)			
MAOEE06270 Setup Fee (Visa Secure, Mastercard Identify Check, American Express SafeKey and Union Pay)	Per Network Project	Included	Fee applies to utilize Card Network's 3D Secure service, providing an additional level of authentication to further secure CNP (Cardholder Not Present) transactions over the Internet. Customer is responsible for all third-party charges, such as OTP SMS fees as pass-through expenses.
MAREE07270 Subscription Fee	Per Month/ Network	\$3,000	Fee applies to monitor and maintain connectivity.
MAREE04270 Usage Fee	Per Month/ Network		Fee applies to use the Network-based 3-D Secure service, to provide an additional layer of cardholder authentication security for CNP (Cardholder Not Present) transactions over the Internet. For Non-US countries OTP text message delivery fee will apply and pass-thru separately.
<u>Account on File</u> 1 to 100,000		Included	
Each additional 100,000 accounts		\$1,500	
OTP (One Time Password) – Yellow Path			
Service Description			i2c offers yellow path authentication, a color-coded security procedure used by digital wallet providers such as Apple Pay and Google Pay, to flag events where a user attempting to add a payment method fails an initial check for the risk of identity theft.
MAOEE06294 Setup Fee	One-time	Included	Fee applies for initial use case discussions, strategy development, configuration, and support for CLIENT testing, for handling additional identity authentication screening before the payment method can be added to the digital wallet.
MAMEE07294B Subscription Fee (i2c Contact Center Live Agent)	Per Month	\$2,500	Fee applies to provide trained agents to customer-specific call handling procedures. The minimum billing amount is in addition to Transaction Processing minimum billing.
MAREE04294A Usage Fee (i2c Contact Center Live Agent)	Per Call	\$10	Fee applies if the program administrator chooses to use the i2c Live Agent Contact Center to field Yellow Path customer verifications via phone (if required).
MAREE04294 One-Time Password (OTP) API	Per API Call	\$0.10	Fee applies to provide the delivery of One-Time Passwords (OTP) notifications via API to program managers for delivery to cardholders (if required).

Dispute Operations Service

Dispute Operations Service			
Service Description			i2c provides dispute operations and chargeback management services utilizing the card network rules and requirements as well as following all applicable regulatory reporting requirements (i.e., Reg-E, Reg-Z).
MAOEE02262 Setup Fee	One-time	Included	Setup for dispute processing, including chargeback processing. Includes disputes regarding all types of transactions supported, including card, ACH, or real-time payments. Includes up to 3 programs. Each additional program is \$1,000.
MAREE02262 Investigation and Case Management	Per Case	\$30	Fee applies for the investigation and case management of a dispute, including Reg E compliant cardholder communications for dispute initiation, posting of provisional credits, posting of provisional credit reversals, and final dispute resolution. Postage included for USA. For non-USA, subject to in-country requirements, additional charges may apply. Chargeback Processing requires one of the following in order for CLIENT to initiate dispute: • i2c cardholder website (C-Holder) where Cardholder initiates dispute • i2c mobile app (C-Mobile) where Cardholder initiates dispute • i2c Live Agent Customer Service where Cardholder initiates dispute • i2c Customer Service Agent Portal (C-Agent) portal where CLIENT's staff initiates dispute • i2c dispute API in CLIENT's website, mobile app, or other tools All Third-Party charges, including but not limited to: network, gateway, and telecom fees are the responsibility of CLIENT and will be billed as pass-through expenses.
MAREE02262A Representment/ Pre-Arbitration – Response and Case Management	Per Case	\$15	Fee applies to i2c's response to an acquirer's representment. All Third-Party charges, including but not limited to: network, gateway, and telecom fees are the responsibility of CLIENT and will be billed as pass-through expenses.

Appendix B – Value Added Services (optional)

Virtual Card Web View

Virtual Card Web View				
Service Description				i2c offers a branded web view for clients to embed in their own digital environments for the display of virtual card details. This service allows clients to avoid PCI compliance scope required for handling of sensitive cardholder information. The i2c web view allows issuers to embed a branded, mobile-friendly, web view for the display of virtual cards and does not offer full C-Holder access.
MAOEE06311 Setup Fee	One-time	\$2,000		One-time cost to brand the client's web view. i2c offers light web view customization options and are generally limited to branding-specific updates. All branding customization requirements subject to final review and approval by i2c.
MAREE07311 Subscription Fee	Per Month	\$500		Fee applies if the client wants to utilize a web-based application to serve cardholders for their virtual card web views as well as all hosting and ongoing maintenance fees.
MAREE04311 Usage Fee <u>Active Accounts on File</u> 1 to 25,000 Each additional 25,000 accounts	Per Month		Included \$250	Fee applies to give access to Active card accountholders. Active cards accounts are accounts that are not in a closed status. i2c will provide and host a branded web view to give active card accountholders secure access to virtual card details. This fee covers all ongoing monitoring, maintenance and hosting cost associated with supporting the mobile web view.

Account Updater

Account Updater				
MAOEE06274 Setup Fee (Visa Automated Account Updater (AAU)/ Mastercard Automated Billing Updater (ABU))	Per Network/ Instance	\$2,500		If customer desires to use the Card Association's account update capability. Note: Network product or regional requirements may make this service required for specific client use cases.
MAREE07274 Subscription Fee	Per Month/ Network/ Instance	\$300		Fee applies to monitor and maintain connectivity.
MAREE04274 Usage Fee <u>Accounts on File</u> 1 to 50,000 Each additional 100,000 accounts	Per Month/ Network		Included \$300	Fee applies to use the Card Association's account updater service; monthly fee computed based on number of accounts on file per month. All third-party charges will be an additional pass-through expense.

Program Management Services

Program Management Services

Program Management - Full

i2c offers a cost-efficient way of engaging experienced banking and payment experts with a thorough understanding of i2c's platform capabilities to fully leverage our clients' investment. The Program Management team will help our clients refine their program's objectives, configure the platform, launch program(s), monitor program(s) performance, support reconciliation and reporting needs, handle back-office operations and provide business advice to efficiently manage daily operations and improve the customer experience. i2c serves as an extension of our client's team, working collaboratively to quickly operationalize program solutions and alleviate many of the day-to-day support operations, enabling our clients to focus their time and resources on strategic initiatives to drive overall growth. Our delivery model approach is designed to reduce the operational overhead required to configure, monitor, manage, report, and recommend account and/or card programs by utilizing purpose built modular features of the i2c platform.

Program Management support services encompass advisory, analytics and operations to share insights, define strategies and execute program plans with a focus on customer experience, engagement and profitability:

- Advisory focuses on establishing, monitoring, and adjusting program parameters to optimize operational efficiency, financial performance, and customer experience.

We deliver specialized expertise in areas such as business processes, functional domain knowledge, industry know-how, and vendor product experience across the accountholder journey - an innovative collaborator to help make an impact. Facilitate strategy sessions among our client, along with various i2c teams, to help define/refine program strategic objectives, value proposition and requirements. Collaborate with our client to assist in designing a growth plan, including go-to-market, channel strategy, and outlining critical customer touchpoints. Based upon data-driven analysis, provide program adjustment recommendations. Support review of market conditions and competitive landscape to recommend considerations for future state opportunities to support a program's success. Collaborate on new initiatives, programs, or product opportunities. Maintain a framework for business and operational activities including roles and responsibilities between all parties.

- Analytics focuses on analyzing and reporting on Key Performance Indicators (KPIs) on a regular cadence focusing on profitability and customer engagement.

We develop a set of KPIs to align with client-defined business goals, value proposition and operational plans. Provide a dashboard for weekly/ monthly summary reviews. Monitor accountholder acquisition, engagement & retention. Create a periodic cadence for the program's critical rule configurations – monitor and report anomalies for discussion. On a monthly/ quarterly basis, establish a governance call to review all critical performance and determine if modifications to program rules or operational adjustments are required. Monitor and analyze critical program performance metrics and identify exceptions.

- Operations focuses on cross functional internal and external management and back-office services to efficiently manage daily operations and ensure operational excellence.

We guide program-level definitions and configure program(s) to support client-defined requirements. Facilitate cross-functional support with various i2c teams to ensure best in class customer experience delivered with operational efficiencies. Provide back-office operations support, including: (i) monitor key program activities to ensure smooth operations and identify inconsistencies, (ii) oversee application processing and account onboarding to maintain accuracy; (iii) monitor spend activities and schedule essential operational reports.

In support of client's credit programs, activities may include credit line management reporting and increase/ decrease recommendations; review fees and charges; monitor delinquency activity and over limit reporting, including alerts notifying accountholders of their past due status and payment due notifications; and monitor payments received through lockbox or bank transfer.

These activities are dependent upon client-specific payment and banking solutions, requirements, use case(s), program type (i.e., deposit accounts, credit, debit, prepaid, lending and more) and start of services.

Setup

MAOEE03000 Setup Fee	One Time/ Per Instance	\$12,000	Fee applies to onboarding clients new to program management support services. Guide program-level definitions (e.g., parameters, values, fees, limit velocities, restrictions, notifications, actions, card packaging, over-limit parameters, delinquency parameters, credit decisioning - when using the i2c decisioning option) and configuration.
